

DIGGERS™ Eco In-Ground Timber Protecta

DESCRIPTION

DIGGERS™ Eco In-Ground Timber Protecta is a non hazardous 'creosote alternative' that provides a tough bitumen coating to improve protection against moisture and deterioration on timber and masonry surfaces.

TYPICAL USES

Increases the life of building materials in outdoor, below ground applications by sealing toxins in and keeping moisture out.

Typically used on:

- Fences, veranda posts and sleepers
- Garden stakes, logs, poles and retaining walls

FEATURES

- Easy to apply with brush, roller or by dipping
- Contains ingredients that help inhibit mould, rot and other corroding effects on timber and masonry surfaces
- Contains no hazardous ingredients (as defined by the Australian Safety and Compensation Council)
- Safer alternative to common timber treatments
- Flexible UV resistant coating which expands and contracts with the timber

APPLICATION

1. Thoroughly shake and stir before and during application.
2. Clean any dirt or dust from timber and apply with a brush, roller or by dipping. If brush clogs during use, soak in DIGGERS™ Kerosene.
3. Apply two coats and allow one hour between coats. Typical application rates are 8–10m² per litre per coat.
4. Posts should have the coating extended at least 10cm above ground level.
5. Clean equipment or spills with water while still wet. Dried spills can be removed with **DIGGERS™ Mineral Turpentine**.
6. To paint over **DIGGERS™ Eco In-Ground Timber Protecta**, allow to dry completely and use a water based acrylic paint.

SAFETY

Wear suitable protective clothing, gloves and eye/face protection when using this product.

TYPICAL CHARACTERISTICS

Appearancedark brown viscous liquid
Odournegligible
Specific Gravity1.01
Flash Pointnone
Boiling Point100°C
