

DIGGERS™ Lacquer Thinner

DESCRIPTION

DIGGERS™ Lacquer Thinner is a specially formulated lacquer and varnish thinner and cleaning solvent.

TYPICAL USES

- Thinning most lacquers and varnishes
- Cleaning solvent for lacquer and varnish
- Removes chewing gum, some inks, waxes, PVC adhesives and other plastics
- Automotive finishes

FEATURES

- Improves paint consistency
- Reduces the risk of imperfections
- Fast drying
- High gloss finish

APPLICATION

Thinning Paint

1. Ensure the surface of the area to be painted is clean, dry and prepared to paint manufacturer's directions.
2. The ratio of thinner to paint should be in accordance with paint manufacturer's guidelines. A general guide is one part thinner to 3 parts paint. All equipment used in mixing and applying the mixture should be clean and dry. When mixing paint and thinner together use accurate measures. Add thinner to paint slowly and stir. Mix thoroughly before application. Apply with a spray gun or brush.

Stripping Paint

1. To strip lacquer or varnish from surfaces or to remove overspray (other than painted surfaces), use a tightly woven, relatively non-absorbent cloth. Wet with **DIGGERS™ Lacquer Thinner** and wipe the surface vigorously until paint has been removed.

General Cleaning

- Wet a lint-free cloth with **DIGGERS™ Lacquer Thinner** and wipe surface to remove chewing gum, some inks, waxes, PVC adhesives and other plastics.

SAFETY

Wear suitable protective clothing, gloves and eye/face protection when using this product.

TYPICAL CHARACTERISTICS

Appearance colourless liquid
 Specific Gravity.....0.82
 Flash Point <0°C
 Boiling Point 79°C
 Flammability Limit 0.8-13%
