

DIGGERS™ Paraffin Oil

DESCRIPTION

DIGGERS™ Paraffin Oil is a colourless hydrocarbon commonly used as a fuel, lubricant and surface sealer. Put simply, Paraffin Oil is candle wax in a liquid form. It is used extensively in 'oil lamps' and as a base for creating scented oils to be burned individually or vaporised in any standard oil burner.

TYPICAL USES

- Lubricant for precision apparatus and plastic modifier
- Fuel – heating, lighting and cooking
- Water tank surface sealer
- Excellent lubrication oil for hinges and moving parts in sewing machines

FEATURES

- Cost-effective and odourless in its raw form
- Colourless, viscous liquid
- Excellent base for scented oils
- Burns readily and cleanly
- Water-insoluble

APPLICATION

- **As a Water Tank Sealer**
 - Add 20ml per m² to water tank to seal water surface. Always keep seal above discharge level.
- **As a Lubrication Oil**
 - Follow machine manufacturer's oiling instructions.

NOTE: Not for human consumption

SAFETY

Wear suitable protective clothing, gloves and eye/face protection when using this product.

TYPICAL CHARACTERISTICS

Appearance colourless liquid
 Odour paraffinic
 Specific Gravity.....0.85
 Flash Point.....210°C
 Solubility<0.1 Wt%
