Inhalation:	Remove victim from exposure if safe to do so. If rapid recovery does not occur, transport to nearest medical facility for additional treatment.
Skin Contact:	If skin contact occurs, wash skin thoroughly with water and follow by washing with soap if available. If any irritation persists, seek medical attention.
Eye Contact:	If in eyes, hold eyes open, flood with water for at least 15 minutes and seek immediate medical attention.
Ingestion:	If swallowed, do NOT induce vomiting. Give a glass of water and seek immediate medical attention.

Symptoms caused by exposure

Inhalation:	May cause irritation and possible chemical burns to the respiratory tract and nasal passages.
Skin:	May cause irritation. Prolonged contact may cause chemical burns.
Eye:	May cause severe irritation and reddening. Prolonged contact may cause permanent damage.
Ingestion:	May cause burns to the mouth and digestive tract.

Medical attention and special treatment

Treat symptomatically.

SECTION 5 FIRE FIGHTING MEASURES

Suitable extinguishing equipment

Use water fog, or fine spray mist to extinguish.

Specific hazards arising from the chemical

Fire or excessive heat may produce hazardous decomposition products such as nitrous gases and sulphur oxides.

Special protective equipment and precautions for fire fighters

Wear full protective clothing and self-contained breathing apparatus. Hazchem code 2X.

SECTION 6 ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Avoid contact with spilled or released material. Shut off leaks, if possible without personal risks. Isolate hazard area and deny entry to unnecessary or unprotected personnel. Spills may be slippery. Ensure that any alkalis, chlorine based products or other products of incompatible classes near the spill are removed. Dam and recover.

Environmental precautions

Use appropriate containment to avoid environmental contamination. Prevent from spreading and entering waterway using appropriate barriers.

Methods and materials for containment and cleaning up

Collect with inert absorbent material such as sand or earth. Consult Local Authority on disposal.

SECTION 7 HANDLING AND STORAGE

Precautions for safe handling

Non-combustible material. Avoid contact with skin, eyes and clothing. Wash thoroughly after handling. Do not eat, drink or smoke in contaminated areas. Always use clean and dry equipment to dispense the product. Dispenser should be cleaned before and after use. All dispensers should be washed out after use.

Conditions for safe storage, including any incompatibilities

Dangerous goods for storage. When not being used, the containers should be stored upright and secured with the original closure. If transfer to another container becomes necessary, ensure that the container is clearly labelled, is of a type suitable for the product, and is clean and free of other materials. Do not store near chlorine based chemicals.

SECTION 8 EXPOSURE CONTROLS AND PERSONAL PROTECTION

Exposure control measures

From National Occupational Health & Safety Commission (NOHSC) Worksafe Australia –
No exposure standard data is available.

Biological monitoring

No biological limit allocated.

Engineering controls

Ensure that adequate ventilation is provided. Avoid generating and inhaling mists and vapours. Keep containers closed when not in use.

Individual protection measures

Eye and face protection:	Wear safety goggles.
Skin protection:	Use solvent resistant gloves, nitrile for longer term protection or PVC and neoprene for incidental splashes.

Product: CALCIUM, LIME AND RUST REMOVER

Respiratory protection:	If work practices do not provide adequate ventilation, use appropriate respiratory protection equipment. When using respirators, select an appropriate combination of mask and filter. Select a filter for organic gases and vapours (boiling point > 65°C). Respirators should comply with AS1716 or an equivalent approved by a state/territory authority.
